

AMENDMENTS

In the Claims

Please amend the claims as indicated below:

133. (Amended) A method of inhibiting cancer comprising:

- A1
- (a) isolating cancer cells from a host;
 - (b) rendering said cancer cells inactive;
 - (c) reintroducing said inactivated cancer cells into said host in a pharmaceutical composition, said pharmaceutical composition further comprising an insect cell composition.
-

138. (Amended) The method of claim 133, wherein said cancer is metastatic.

139. (Amended) The method of claim 140, wherein said exogenous DNA is a baculovirus expression vector.

A2
Sub B1

140. (Amended) The method of claim 139, wherein said insect cell composition comprises an exogenous DNA.

141. (Amended) The method of claim 139, wherein said exogenous DNA encodes an immunomodulator.
